

Charge at Home

Advancing electric vehicle charging infrastructure
at multifamily housing

Charge at Home, a program of Forth, provides free electric vehicle (EV) charging education, tools and guidance to the multifamily industry.

 www.chargeathome.org

Charge at Home Resources:

- Free property-specific EV charging consultation calls
- EV and EV charging 101
- Multifamily EV charging project case studies
- Property Decision-Makers and Resident-focused educational materials
- Market-segmented EV charging readiness toolkits (new builds/existing)
- EV charging project builder tool (ROI calculator, incentive identifier, etc.)

Supporting EV Charging Adoption at Multifamily Properties

Connect with our team for site-specific guidance about potential cost savings, identifying vendors, business model considerations, and EV charging tech designed to simplify charger management and use at MFH properties.
